SUMMARY

MGM Dental College in association with IDA constantly takes efforts of extending the oral health care to the community. The oral care initiative was also extended to patients at Libra health care center, Vasai with the intention of screening patients for Oral Cancer under the MOCC program.

Aim and objective:

1. To assess the oral cancer prevalence.
2. To screen patients for presence of oral cancer.

Method

A type III examination was carried out with the use of mouth mirror and probe in day light. All the patients were assessed for oral cancer and were explained the need to get the problems corrected. The patients were made aware of the existing dental problems and preventive measures were explained.

Observations: A total of 22 patients were examined for oral cancer. Those requiring extensive treatment were referred to MGM Dental College and Hospital, Kamothe.

Sign:

Condition	No. of individuals	Percentage %
White lesions	0	0
Red lesions	0	0
Patients with Habits	06	27.3%
Dental Diseases	19	86.4%

Interpretation and conclusion: Cancer is a preventable oral disease. So adequate Oral health education and prevention strategies should be implemented in order to reduce the disease burden among these patients. Patients present were screened for oral Cancer.
