

MAHATMA GANDHI MISSION'S DENTAL COLLEGE & HOSPITAL

Accredited by NAAC with "A++" Grade

Junction of NH-4 and Sion Panvel Expressway,

Sector-1, Kamothe, Navi Mumbai- 410 209

E-Mail: mgmdch@mgmmumbai.ac.in

Tel: 022- 27436604

Fax: 91-22-274331

Date: 01/01/2025

Dr. Srivalli Natarajan
Dean

No. MGM/DCH/03 /2025

CIRCULAR No. : 01 /2025

This is to inform that Department of Oral Pathology & Microbiology with the IQAC, MGM Dental College & Hospital Kamothe, Navi Mumbai, is organizing an "ADD-ON COURSE" on "Routine Staining in Histopathology" during practical hours. The details of the same are as follows

Speaker: Dr. Shilpa Patel
Date & time: 6th and 7th January 2025
Venue: Preclinical Lab, Department of Oral Pathology
Registration fees: Nil
Target group: First Year BDS students

S. Srivalli
Dean

Copy to: All Dept. Medical and Dental Colleges

MAHATMA GANDHI MISSION DENTAL COLLEGE & HOSPITAL

Accredited by NAAC with "A++" Grade

Plot No. 1 & 2 Sector-01 (Old 18 & 19), Kamothe, Navi Mumbai- 410209

E-Mail ID: mgmdch@mgmmumbai.ac.in

Add On Course

Course Name: Routine Staining	Conducted Date: 6 th – 7 th January 2025
Department: Oral & Maxillofacial Pathology	Resource Person: Dr. Shraddha Ghaisas Dr. Niharika Swain
Participant Group and Total Attendees: 102 I BDS students	

Hematoxylin and eosin stain (H&E) is one of the principal stains in histology. This stain has been unchanged for many years because it works well with a variety of fixatives and displays a broad range of cytoplasmic, nuclear, and extracellular matrix features. It provides the pathologist/researcher a very detailed view of the tissue and is often sufficient to allow a disease diagnosis based on the organization (or disorganization) of the cells and also shows any abnormalities or particular indicators in the actual cells (such as nuclear changes typically seen in cancer). Even when advanced staining methods are used, the H&E stain still forms a critical part of the diagnostic picture as it displays the underlying tissue morphology which allows the pathologist/researcher to correctly interpret the advanced stain. As part of curriculum the I BDS students are taught about the routine staining however practical application of same is not performed. Hence this course is undertaken to make student understand the basic of routine staining through practical point of view.

▪ Skills Acquired:

The I BDS Students were allowed to perform all steps of routine staining (Hematoxylin and Eosin) on soft and hard tissue sections

Dr. Shilpa Patel
Prof & HOD

ABOUT THE COURSE:

Haematoxylin–eosin stain (H & E) is one of the most imperative tissue stains used in histology as it is inexpensive, done quickly and done in such a way that a considerable amount of microscopic anatomy is revealed. H & E stain can be used to diagnose a wide range of histopathologic conditions. It is significant to study principle and procedure of routine H & E staining. For undergraduate students, the procedure is less understood. This add-on course will bring staining procedure into limelight.

ABOUT SPEAKER

Dr. Shilpa Patel (BDS, MDS)

Dr Shilpa Patel is presently working as an Professor and HOD in Dept of Oral Pathology & Microbiology, MGM Dental College & Hospital, Navi Mumbai. She has been in academics since the past 27 years. She is actively involved in teaching with special interest in Dental histology and Histopathology.

Program Schedule

- ☐ Didactic lecture
- ☐ Pre-clinical hands on training
