TREATMENT CAMP AT SHREE GANESH ENGLISH SCHOOL, SHIVKAR

Date: 3rd October 2023

Venue: Shree Ganesh English School, Shivkar

Faculty: Dr. Ankit Shah, Dr. Neeraj Kolge

Organizing Agency: PHD Dept MGM DCH; NSS Unit, MGM DCH, Lions Club of Panvel

Number of Students attended : 06

A free dental screening and treatment camp was organized by MGM Dental College & Hospital in association with Lions Club Panvel for the students at Shree Ganesh English School, Shivkar, on the 3rd October 2024. The oral care initiative aimed to create awareness and provide oral health care and treatment to the patients. A mobile dental van was made available for treating the patients."

Aim and objective:

1. To assess the oral health status of patients and provide necessary dental treatment.
2. To educate and create awareness about oral health among the participants.

Method:

The dental treatment camp took place at Shree Ganesh English School, Shivkar. Patients underwent examinations for health issues using a mouth mirror and probe while seated in a dental chair. All patients received assessments of their oral health status and were briefed on the importance of addressing any issues. They were informed about any existing dental problems and provided with explanations of preventive measures. Necessary treatments such as pit and fissure sealants, ultrasonic scaling, and restorations were administered.

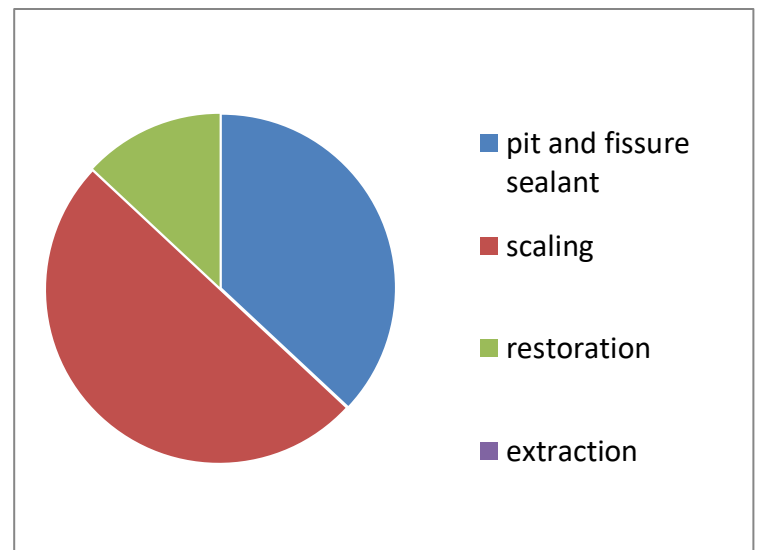

Observations:

A total of 25 patients were treated for various dental problems. Those requiring extensive treatment were referred

To MGM Dental College and Hospital, Kamothe.

Oral health status:

Treatment	No. of individuals	Percentage %
Pit & fissure	9	51
Scaling	13	69
Restoration	03	18
Extraction	0	0

**Interpretation and conclusion:**

Patients requiring scaling were 69% which indicates that they have less information about importance of brushing and brushing techniques. 51% patients needed pit and fissure sealant and 18% patients required restoration. This indicates that they also suffered from dental caries. Oral health education and prevention strategies were implemented in order to reduce the disease burden among these patients.
