Bacterial infections from tooth or gingiva can cause swellings in the oral cavity which can be painful. MGMDental College constantly takes efforts of extending the oral health care to the community. The oral care initiative was also extended to patients at DSP school kamothe with the intention of creating awareness about swelling in oral cavity and providing oral health care to the patients.

Aim and objective:

1. To assess the oral health status of patients and to provide necessary Dental treatment.
2. To educate them and create awareness about swelling in oral cavity.

Method:

A type IV examination was carried out with the use of Tongue depressor in day light. All the patients were assessed for oral health status and were explained the need to get the problems corrected. The patients were made aware of the existing dental problems and preventive measures were explained.

Observations: A total of 942 patients were examined for various dental problems. Those requiring extensive treatment were referred to MGM Dental College and Hospital, Kamothe.

Oral health status:

Conditions	No. Of Individuals	Percentage
Dental Caries	456	48
Gingivitis	389	41
Root Piece	97	10

Interpretation and conclusion:

Dental caries is the most common problem among the patients followed by malocclusion. Oral health education and prevention strategies should be implemented in order to reduce the disease burden among these patients.
