Organizing and participating in camps have been an integral part of health services, especially in developing countries like Nepal. Hospital service and specialist care are still out of reach of many people. Still many patients wait in free camps for the treatment of their diseases. Health Camp content is focused on improving or extending the efficacy of health care by embracing social networks, open standards, and the latest web and mobile technologies. With existing and limited resources too, with full community participation also we can serve the community and this is the main theme of organizing health camps. MGM Dental College & Hospital takes conscious efforts in educating and promoting good oral health care among the community members. This was extended to the people at SBSS, Panvel with the aim to create awareness and provide dental care to them.

Aim and objective:

1. To assess the oral health status of the members.
2. To educate them about the benefits of maintaining good oral hygiene
3. To provide Basic dental treatment to the devotees

Method:

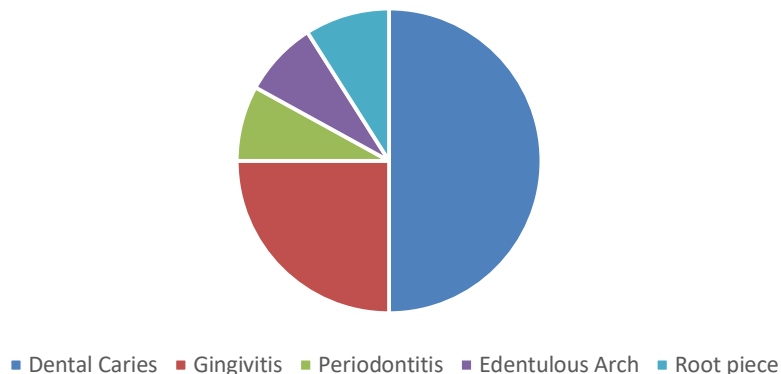

The people were assessed using a mouth mirror and probe on the dental chair. The oral health status of the people were evaluated and explained about the nature of the oral problems. Various preventive and corrective measures to be undertaken were explained to the patients.

Observations: A total of 12 patients were examined for various dental problems. Those requiring extensive treatment were referred to MGM Dental College and Hospital, Kamothe.

Oralhealth status:

Condition	No. of Individuals	Percentage
Dental Caries	6	50
Gingivitis	3	25
Periodontitis	1	8
Edentulous Arch	1	8
Root Piece	1	9

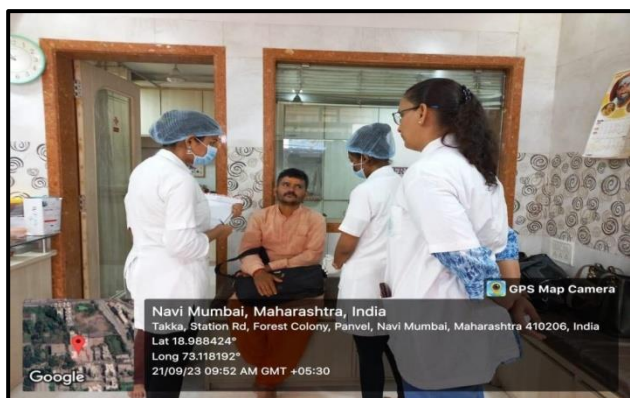

Oral Health Status

Interpretationandconclusion:

Dentalcariesandgingivitisweremostprevalentintheevaluatedgroup.Thiswasfollowedbyperiodontitis. Preventive and corrective measures were undertaken to prevent further deterioration oforalhealth.

Treatment: As a part of preventive treatment measures, oral prophylaxis was provided to the patients at SBSS, Panvel.
