IMPORTANCE OF REGULAR DENTAL CHECK UP AT ZP SCHOOL, NAVADE

Date: 21st December, 2023

Venue: ZP School, Navade

Faculty: Dr. Rafeeq Nalband, Dr. Prachiti Terani

Organizing Agency: Department Of Public Health Dentistry, MGMDCH; NSS Unit, MGMDCH

Number of Students attended: 5

A routine dental check-up is important to ensure that there are no issues with your oral health and to detect any concerns as early as possible. The best way to deal with oral health concerns is through prevention.

A routine dental check-up allows you to detect potential issues before they worsen and to receive the proper preventive and restorative care. An oral health check up and treatment camp organized by MGM Dental College to spread awareness regarding the dental health in our community. An initiative was taken at the ZP School, Navade for the residents of the Navade village to create awareness regarding the importance of regular dental check up

Aim and objective:

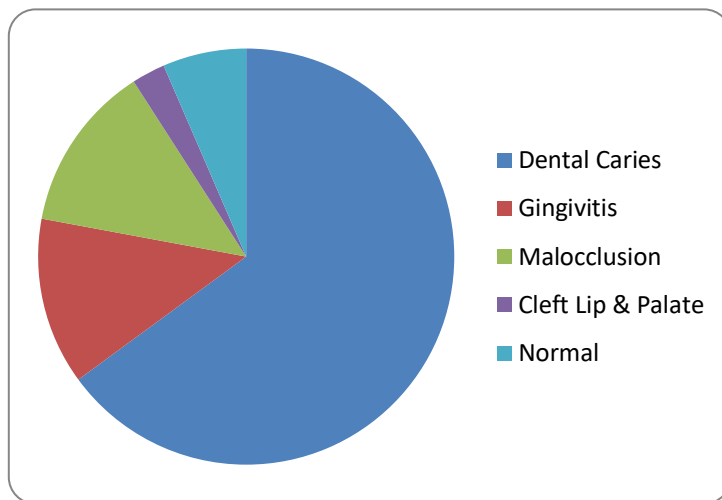

1. To assess the oral health status of patients and to provide necessary Dental treatment.
2. To create awareness about importance of regular dental check up

Method:

An examination was carried out with the use of ice cream sticks in day light. All the patients were assessed for oral health status and were explained the need to get the problems corrected. The patients were made aware of the existing dental problems and preventive measures were explained. Tooth Brushing technique was explained.

Observations: A total of 78 patients were examined for various dental problems. The visitors were detected with dental caries, gingivitis, malocclusion. Those requiring extensive treatment were referred to MGM Dental College and Hospital, Kamothe.

CONTENT	NO. OF INDIVISUAL	PERCENTAGE
Dental caries	50	65
Gingivitis	10	13
Malocclusion	10	13
Cleft lip and palate	2	3
Normal	5	6

Interpretation and conclusion:

There were 78 screenings conducted at this camp .

1. Dental caries is the most common problem among the patients followed by gingivitis. Dental caries and gingivitis are the most common problem among the patients which can be reduced by utilizing proper and prompt treatment
2. Oral health education and prevention strategies should be implemented in order to reduce the disease burden among these patients. Majority of the oral diseases are due to lack of proper health education of the patient.
