Venue: Shre- Ganesh English- Medium School Shivkar

Faculty: Dr.Ankit Shah , Dr. Agraja patil

Organizing Agency: Department of Public Health Dentistry & NSS Unit, MGMDCH & Lions club Panvel

Number of Students attended:4

A routine dental check-up is important to ensure that there are no issues with your oral health and to detect any concerns as early as possible. The best way to deal with oral health concerns is through prevention. A routine dental check-up allows you to detect potential issues before they worsen and to receive the proper preventive and restorative care. MGM Dental College constantly takes efforts of extending the oral health care and any dental emergency. The oral care initiative was also extended to Shivkar with the intention of creating awareness about the awareness of management of dental emergency

Aim and objective:

1. To assess the oral health status of patients
2. To educate them and create awareness of dental emergency.
3. Effect of regular check-up on overall health of the individuals.

Method:

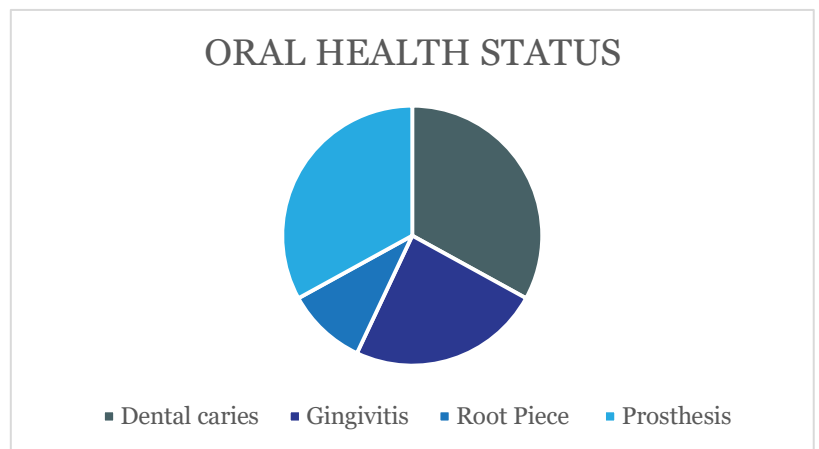

A routine dental check-up helps with the prevention of a range of oral health concerns, including but not limited to periodontal disease, teeth decay, and teeth stains. Regular dental checkups act as a vital line of defense against such issues. To raise awareness of dental emergency management at Shree Ganesh English Medium School, a comprehensive plan can be implemented. Here's an outline of how this awareness initiative could be conducted Awareness Session for Students and Staff- Basic dental hygiene and how to prevent common dental emergencies like toothaches, broken teeth, or gum injuries. conduct an interactive session on recognizing and

responding to dental emergency. Show simple first-aid steps for dental trauma, like using cold compresses for swelling or saving a knocked-out tooth, handling knocked-out teeth (re-implantation within 30 minutes or storing in a medium like milk). Managing chipped teeth, severe toothache, or abscesses. Ensure the school has a dental emergency kit that includes items like gauze, saline solution,

Observations: A total of 21 patients were examined for various dental problems. Treatment was provided to the patient depending upon the requirement.

Oral health status:

Condition	No. of individuals	Percentage %
Dental caries	7	33
Gingivitis	5	24
Root piece	2	10
Prosthesis	7	33

Interpretation and conclusion:

1. Dental caries are the most common problem among the patients which can be reduced by utilizing proper diet and nutrition. A regular dental check-up can lead to decrease in the number of decayed teeth.
2. Oral health education and prevention strategies should be implemented in order to reduce the disease burden among these patients. Majority of the oral diseases are due to lack of proper health education of the patient and insufficient dietary intake.
3. Dental emergency kit should be provided in every school which includes gauze and saline solution.
