AWARENESS OF TRAUMATIC INJURIES AT GANDHI CENTER, PUNE

Date : 5th September 2023

Venue: Mahatma Gandhi School, Pune

Faculty: Dr. Srivalli Natrajan, Dr. Shrirang Sevekar, Dr. Sarika Shetty Dr. Pankaj Londhe , Dr. Devanshi Shah, Dr. Prachiti Terni

Organizing Agency: Department of Public Health Dentistry, NSS Unit of MGMDCH

Number of Students attended: 5

Oral traumas are not frequent and make up to 5% of all injured parts of the body of all ages while in age group of 0-6 years it comprises about 17% (7). Traumatic dental injuries are more prevalent in permanent (58.6%) than in primary dentition where they constitute 36.8% (8, 9). Dental injuries mainly involve front teeth of the upper jaw. The most frequent causes of these injuries are falls, sport activities, bicycling, traffic accidents. MGM Dental College constantly takes efforts of extending the oral health care to the community. The oral care initiative was also extended to patients at Mahatma Gandhi School, Pune. On the occasion of Teacher's day, students have organised cultural program, along with the intention of screening patient for oral hygiene and to create awareness on dental traumatic injuries, which is organized by MGM Dental collage and hospital, Navi Mumbai. On this occasion, students have performed songs, plays, acknowledging the contribution of the great Mahatma Gandhi and their values, with the presence of Rajmohan Gandhi- the grandson of the great Mahatma Gandhi, Dean of MGM Dental Collage and Hospital Dr. Srivalli Natrajan.

Aim and objective:

1. To assess the oral health status of patient and to provide necessary dental treatment.
2. To educate them and create awareness regarding maintaining oral hygiene and Traumatic Injuries

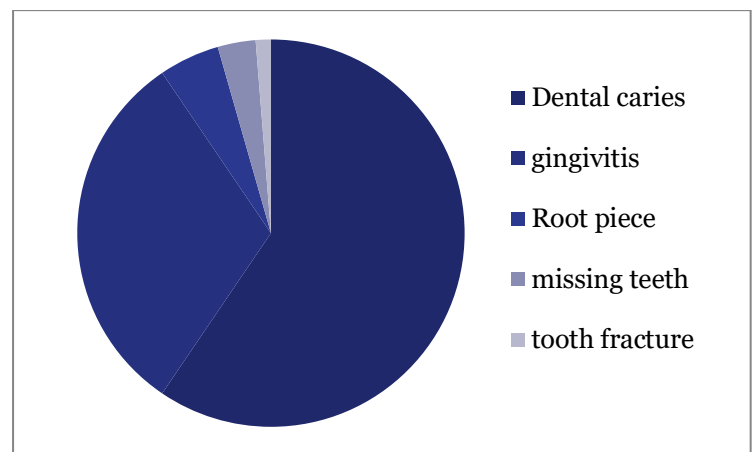

Sign:

Method:

A type III examination was carried out with the use of mouth mirror and probe in day light. All the patients were assessed for oral health status and were explained the need to get the problems corrected. The patients were made aware of the existing dental problems and preventive measures were explained.

Observations: A total of 73 patients were examined for various dental problems and oral hygiene and prevalence of dental caries and Traumatic Injuries among students. Those requiring extensive treatment were referred to MGM Dental College and Hospital, Kamothe.

Condition	No. of individuals	Percentage %
Dental caries	69	94
Gingivitis	36	49
Root Piece	6	8
Missing teeth	4	5
Tooth fracture	2	3

Interpretation and conclusion: Dental Caries is the most common problem among the patient followed by gingivitis

Oral health education and prevention strategies and awareness regarding traumatic injuries should be implemented in order to reduce disease burden among the patient.
