Venue: MGM MEDICAL HOSPITAL, KAMOTHE

Faculty: Dr. Mausami Malgaonkar, DR. Vaibhav Thakkar

Organizing Agency: PHD DEPT, NSS unit of MGMDCH & PSM Dept MGM MEDICAL COLLEGE, KAMOTHE

Number of Students attended: 6

Higher hormonal levels during pregnancy may affect the way gums react to plaque. There is increased risk for certain dental problems during pregnancy including- Gingivitis, cavities, Periodontal problems.

MGM Dental College keeps organizing oral health check up and treatment camps to enhance the dental health in our community. Such an initiative was taken in association with MGM Hospital, Kamothe to create awareness about pregnancy and dental health.

Aim and objective:

1. The aim of the camp was to educate pregnant women on the management of dental health during pregnancy.
2. To equip them with the necessary knowledge and skills to handle such situations effectively
3. To assess the oral health status of the patients.

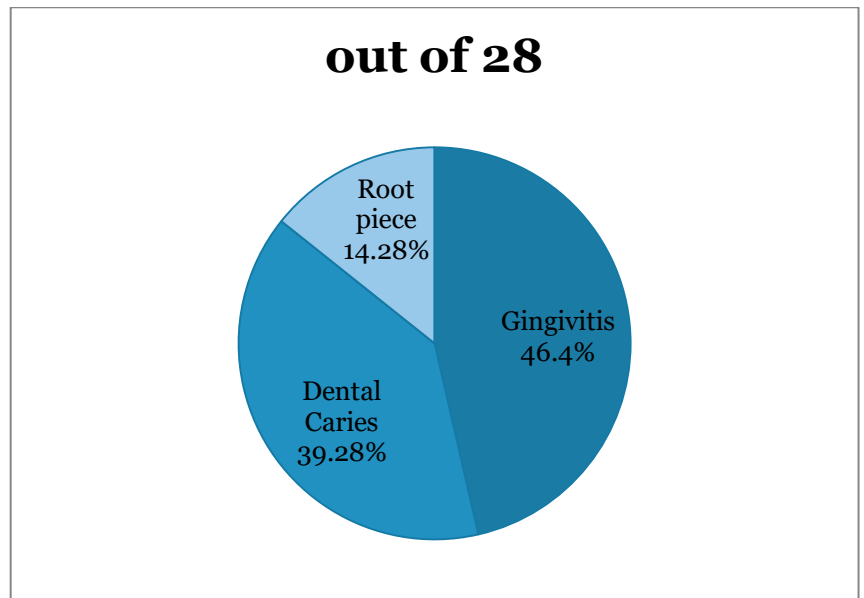

Method:

Pregnant women were explained about how hormonal changes during pregnancy may affect the dental health, which may cause increased risk for certain problems such as Gingivitis, Cavities, Periodontal problems.

After the awareness program, oral examination was conducted using ice-cream sticks. All patients were examined for dental caries, gingiva and periodontal health and other oral health related diseases during pregnancy.

Observations: A total of 28 patients were examined for various dental problems.

Condition	No. of individuals	Percentage %
Gingivitis	13	46.4%
Dental Caries	11	39.28%
Root piece	4	14.28%

Interpretation and conclusion:

1. The ANC camp on pregnancy and dental health was a success. It achieved its objectives of raising awareness and imparting knowledge among the patients.
2. Gingivitis, dental caries are the most common problems among the pregnant women.
3. Oral health education and prevention strategies should be implemented in order to reduce the disease burden among these patients.

Dental care for pregnant women

Educating the patients about dental health during pregnancy
