AWARENESS ABOUT PERIODONTAL DISEASE AT SRI BHAGVATISAISANSTHAN,PANVEL.

Date:16/11/2023

Venue: Sai Baba Temple, Panvel

Faculty: Dr.Deeksha Shetty, Dr. Prachiti Terani

Organizing Agency: Department of Public Health Dentistry, NSS Unit, MGMDCH & Shri Bhagwati Sai Sansthan, Panvel

Number of Students attended: 2

Periodontal diseases consists of a wide range of inflammatory conditions which causes degeneration of Periodontium and affects all supporting structures of teeth such as gingiva, periodontal ligament, cementum and alveolar bone etc. followed by teeth loss. MGM Dental College & Hospital along with NSS unit conducts dental camp for creating awareness on periodontal diseases. This was extended to visitors SBSS, Panvel with the aim to educate regarding periodontal health.

Aim and objective:

- To raise awareness about periodontal diseases.
- To educate individuals on maintaining periodontal health.
- To provide basic dental care for their current dental issues..

Method:

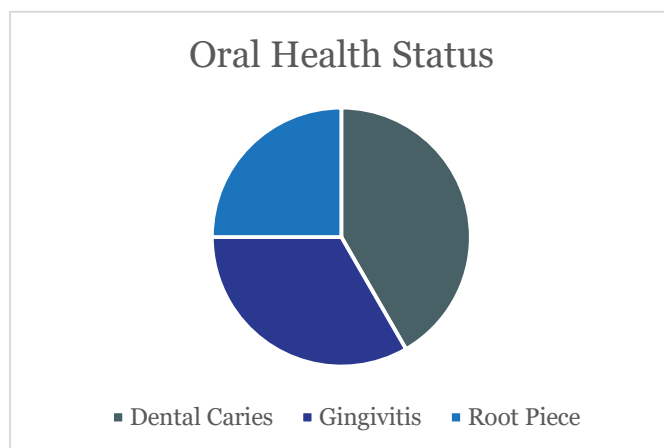

The patients were assessed using a mouth mirror and probe on the dental chair. The oral health statuses of the visitors were evaluated and they were explained about the periodontal diseases. They were also advised to avoid habits like smoking and mishri applications. Various preventive and corrective measures to be undertaken were explained to the patients. The visitors who consented for treatment were provided with basic dental care for their existing dental problems. Visitors having extensive dental problems were referred to MGM Dental College & Hospital for further treatment.

Observations:

A total of 11 patients were examined for various dental problems. Those requiring extensive treatment were referred to MGM Dental College and Hospital, Kamothe.

ORAL HEALTH STATUS:

Conditions	No. Of Individuals	Percentage
Dental Caries	5	45
Gingivitis	4	36
Root piece	3	27

Interpretation and conclusion:

The visitors had a good understanding of nutrition.

Dental caries and gingivitis were the most prevalent conditions in the evaluated group, followed by periodontitis. Preventive and corrective measures were taken to prevent further deterioration of oral health.

Treatment: As part of the preventive treatment, silver amalgam fillings were provided, and oral prophylaxis was performed for the patients at SBSS, Panvel.

Treatment Being Done by the Team Members
