A camp was held at Shree Sanatan Dharm School where school students were taken for oral screening and awareness of inter dental aids. Each and every students were educated about the advantages of using inter dental aids.MGM Dental College constantly takes efforts of extending the oral health care to the community. The oral care initiative was also extended to school students at Shree Sanatan Dharm School, Chembur and the teachers of the school with the intention of creating awareness about the use of Inter Dental Aids.

Aim and objective:

1. To assess the oral health status of patients and to provide necessary Dental treatment and motivate them to use interdental aids for effective oral hygiene.
2. To educate them and create awareness about use of inter dental aids.
3. Effect of regular check-up on overall health of the individuals.

Method:

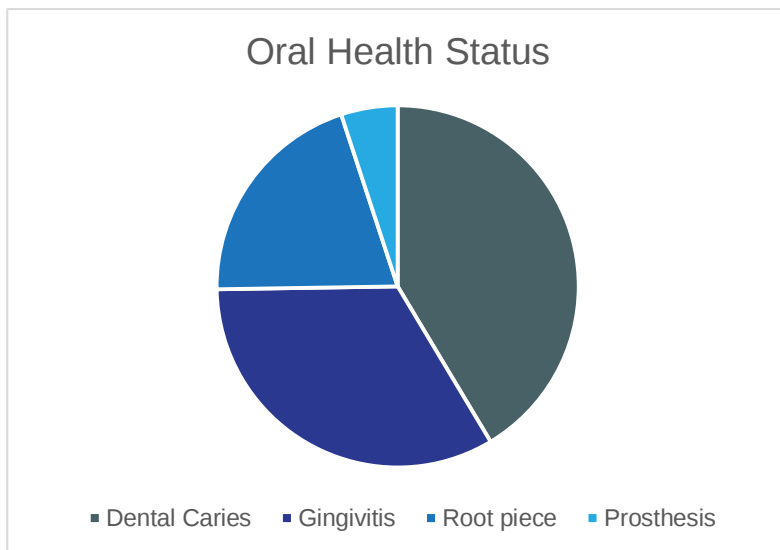

Inter-dental aids are tools designed to clean between teeth, helping to maintain oral hygiene and prevent gum disease.

Many people are unaware of the importance of inter-dental cleaning. InterDental aids are often recommend incorporating these aids into daily routines for optimal oral health. Educating patients about proper techniques and the benefits can lead to better overall dental care. Every patient reported for oral screening was

demonstrated the methods of using inter dental aids , patients were also educated on various interdental aids available in the market and their usage .

Observations: A total of 387 patients were examined for various dental problems. Those requiring extensive treatment were referred to MGM Dental College and Hospital, Kamothe.

Condition	No. of individuals	Percentage %
Dental Caries	157	41
Gingivitis	126	33
Root Piece	79	20
Prosthesis	25	5

Interpretation and conclusion:

1. Food lodgment and gingivitis are the most common problem among the patients which can be reduced by utilizing proper interdental aids.
