■ **Course Objective:**

Fixed dental prosthesis-Tooth preparation, final impression and provisionalisation for II BDS student. It aims to orient the second BDS students about what is Fixed dental prosthesis, the principles of tooth preparation, the techniques of final impression and provisionalisation using protemp. It will help the students to relate the theoretical knowledge and imply them practically by self-performing the tooth preparation on typodont.

The Programme includes Lecture, Demonstration and Hands-on on the following topics:

1. Tooth preparation with central incisor
2. Final impression using single step double mix technique with addition silicone.
3. Provisionalisation using protemp

■ **Course Conduct:**

Date : 18th August 2023

Time : Lecture :- 8:30 am to 9:30 am

Demonstration: 9:30 am to 11:30 am

Hands on: - 11.30 am onwards

Venue : Prosthodontics Preclinical Lab 3rd floor

■ **Course Outcome:**

Students learnt about the terminologies of Fixed dental prosthesis, the concept of Tooth preparation, techniques of final impression and provisionalisation using the Putty Index and Protemp. Students gained theoretical knowledge through lecture, Acquaintance skills through demonstration and clinical skills through Hands-on. They learnt about steps in tooth preparation, different techniques of making final impression and different techniques of provisionalisation.
