AWARENESS OF HARMFUL EFFECTS OF MISHRI AT TURMALE, VILLAGE

Date: 1st July 2023

Venue: Turmale, Village

Faculty: Dr. Pankaj Londhe, Dr. Prachiti Terni

Organizing Agency: PHD Dept MGMDCH; NSS Unit, MGMDCH

Number of Students attended: 04

MGM Dental College constantly takes efforts of extending the awareness about harmful effects of mishri to the community. The initiative was also extended to patients at Turmale with the intention of creating awareness and providing knowledge on the same.

Aim and objective:

1. To assess the number of patients who consumed mishri.
2. To educate them and create awareness about harmful effects of mishri.

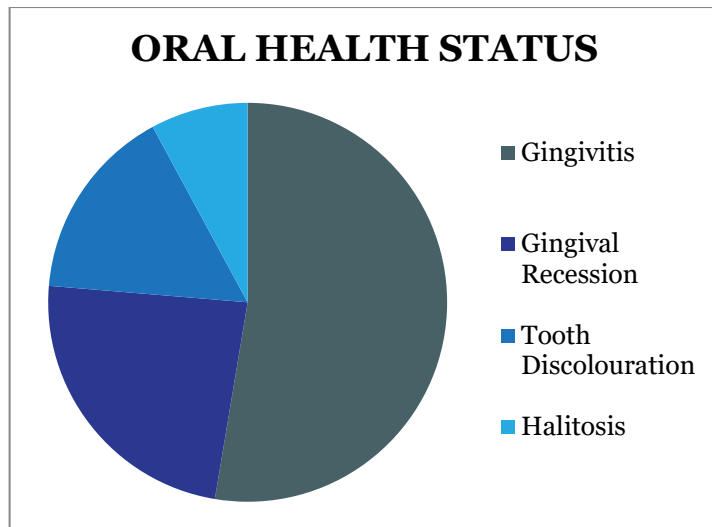

Method:

A type III examination was carried out with the use of mouth mirror and probe in day light. All the patients were assessed for oral health status and consumption of mishri. The patients were made aware of the harmful effects of consuming mishri like gingival recession, discoloration of teeth, tooth abrasion and halitosis.

Observations: A total of 34 patients were examined for various dental problems. Those requiring extensive treatment were referred to MGM Dental College and Hospital, Kamothe.

Oral health status:

Condition	No. of individuals	Percentage %
Gingivitis	20	52%
Gingival Recession	9	6%
Tooth Discoloration	6	35%
Halitosis	3	5%

Interpretation and conclusion:

Gingivitis is the most common problem among the patients followed by gingival recession.

Awareness of harmful effects of mishri and prevention strategies should be implemented in order to reduce the disease burden among these patients.

Oral Health checkup done by team members
