**TREATMENT CAMP FOR WORKERS OF OBEROI SPLENDOR, ANDHERI**

**Date: 4<sup>th</sup> February, 2024**

**Venue: Oberoi Splendor, Andheri**

**Faculty: Dr. Ankit Shah, Dr Neeraj Kolge**

**Organizing Agency: Department Of Public Health Dentistry, MGMDCH; NSS Unit, MGMDCH; Rotary Club**

**Number of Students attended: 06**

The oral health camp along with treatment was organized by MGM Dental College & Hospital to raise awareness about the significant role of nutrition and diet in maintaining good oral health among the workers of Oberoi Splendor.

**Aim and objective:**

1. To assess the oral health status of the workers of Oberoi Splendor.
2. To educate them about the importance of making healthy food choices and its impact on oral health.
3. Emphasize the importance of regular dental check up to detect and address any oral health issues earlier

**Method:**

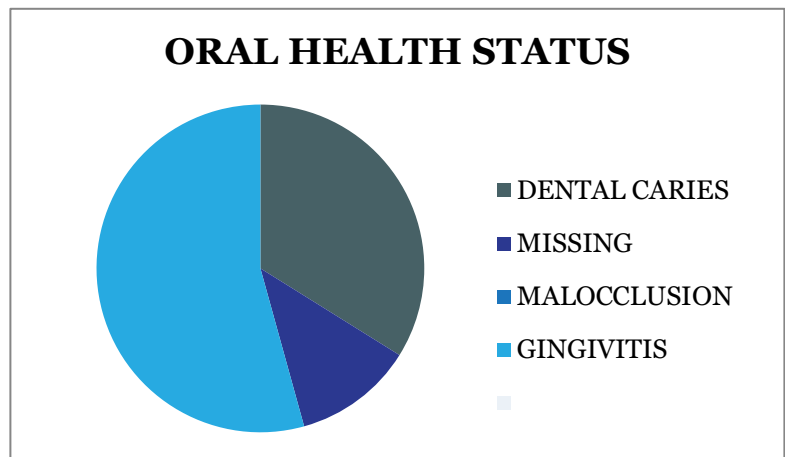

The workers were assessed using a mouth mirror and probe on the chair. The oral health statuses of the workers were evaluated and they were explained about the nature of their oral health problems. Various preventive and corrective measures to be undertaken were explained to the patients. The workers were explained about the healthy eating habits and were encouraged to incorporate more fruits and vegetables and

dairy products into their diets, while reducing the consumption of sugary and acidic foods in their diet. Workers having extensive dental problems were referred to MGM Dental College & Hospital for further treatment.

**Observations:** A total of 186 patients were examined for various dental problems. Those requiring extensive treatment were referred to MGM Dental College and Hospital, Kamothe.

**Oral health status:**

| Condition     | No. of individuals | Percentage % |
|---------------|--------------------|--------------|
| Dental caries | 63                 | 34           |
| Gingivitis    | 101                | 54           |
| Missing       | 22                 | 19           |
| Malocclusion  | 0                  | 0            |

**Interpretation and conclusion:**

- Dental caries and gingivitis were most prevalent in the evaluated group. This was followed by periodontitis. Preventive and corrective measures were explained to prevent further deterioration of oral health.

Investigation Being Done by the Team Member

### List of Attendees

| Sr. No                    | Name of faculty |
|---------------------------|-----------------|
| 1                         | Dr. Ankit Shah  |
| 2.                        | Dr Neeraj Kolge |
| Name of Interns& Students |                 |
| 3                         | Rayyan Ansari   |
| 4                         | Khushi Bhatia   |
| 5                         | Apurna Pal      |
| 6                         | PragatiAgarwal  |
| 7                         | Khan Mehewish   |
| 8                         | Krupa Patil     |
