**ILL EFFECTS OF SUGAR INTAKE AWARENESS CAMP AT D.B. PATIL NEW ENGLISH
SCHOOL, KAMOTHE**

Date: 7th & 8th August 2023

Venue: D.B.Patil NES School, Kamothe

Faculty: Dr. Kashmira Kadam, Dr. Rafeeq, Dr. Neeraj Kolge

Organizing Agency: PHD Dept MGMDCH; NSS Unit, MGMDCH, Lions Club

Number of Students attended: 12

An oral health care awareness and treatment camp was conducted by MGM Dental College and Hospital in association with Lions Club at D. B. Patil School, Kamothe. The students and teachers of the school were made aware about the ill effects of sugar intake. They were also briefed about maintenance of oral hygiene including brushing technique and flossing.

Aim and objective:

1. To assess the ill effects of sugar intake in patients and to provide necessary Dental treatment.
2. To educate them and create awareness about oral health.

Method:

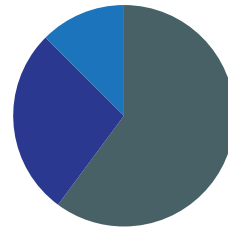

A type III examination was carried out with the use of mouth mirror and probe in day light. All the patients were assessed for oral health status and were explained the need to get the problems corrected. The patients were made aware of the existing dental problems and preventive measures were explained.

Observations: A total of 670 patients were examined for various dental problems. Those requiring extensive treatment were referred to MGM Dental College and Hospital, Kamothe. Non invasive treatment was carried out including scaling of 31 patients and fluoride application of 34 patients.

Oral health status:

Condition	No. of individuals	Percentage %
Dental caries	403	60%
Gingivitis	183	27%
No Findings	84	13%

ORAL HEALTH STATUS

- Dental Caries
- Gingivitis
- No findings

Interpretation and conclusion:

Dental caries is the most common problem among the patients who take sugar supplements followed by gingivitis.

Oral health education and prevention strategies should be implemented in order to reduce the disease burden among these patients.
