INFECTION CONTROL POLICY DOCUMENT

PURPOSE:

Strengthening infection control measures will reduce the incidence of Dental Hospital Associated Infection through rigid implementation of aseptic and disinfection policies. Basic measures of infection control, education & training of Dental Health Care Professionals (DHCP) on standard precautions, good practices, antibiotic policy and proper biomedical waste management will help in effective control of Infection both for the patient and Dental Health Care Professionals (DHCP).

OBJECTIVES:

- 1] To provide guidelines for procedures necessary to implement standard and additional (Transmission - based) precautions for the control of infections.
- 2] To provide guidelines for cleaning, disinfection and reprocessing of reusable equipment
- 3] To provide guidelines the s for the segregation and disposal of biomedical waste
- 4] To provide guidelines for Infection control practices in special situations.
