ORAL HEALTH SCREENING AND IMPORTANCE OF FLUORIDE APPLICATION **AT ADIWASI SCHOOL, SHANTIVAN**

Date: 4th to 9th February 2023

Venue: Annasaheb Sahasrabuddhe Madhyamik Adiwasi School, Shantivan

Faculty: Dr. Vaibhav Thakkar, Dr. Agraja Patil, Dr. Neeraj Kolge, Dr. Prachiti Terni, Dr. Pankaj Londhe

Organizing Agency: PHD Dept MGMDCH; NSS Unit

Number of Students attended: 54

MGM Dental College in association with NSS constantly takes efforts of extending the oral health care to the community. The oral care initiative was also extended to patients at Adivasi School Shantivan with the intention of creating awareness and providing health care to the patients.

Aim and objective:

1. To assess the oral health status of patients and to provide necessary Dental treatment.
2. To educate them and create awareness about oral health.
3. To provide fluoride treatment to the students of the school. .

Method:

A type III examination was carried out with the use of mouth mirror and probe in day light. All the patients were assessed for oral health status and was explained the need to get the problems corrected. The patients were made aware of the existing dental problems and preventive measures were provided.

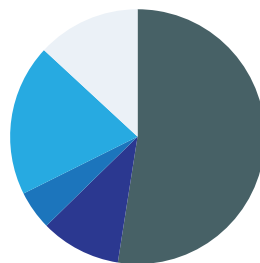

Observations: A total of 343 patients were examined for various dental problems. Those requiring extensive treatment were referred to MGM Dental College and Hospital, Kamothe. Topical fluoride applications were performed for the school children.

Sign:

Oral health status:

Condition	No. of individuals	Percentage %
Dental caries	180	52%
Gingivitis	66	19%
Missing	35	9.9%
Malocclusion	17	4. %
No Findings	45	13.11%

ORAL HEALTH STATUS

■ DENTAL CARIES
■ MISSING
■ MALOCCLUSION
■ GINGIVITIS

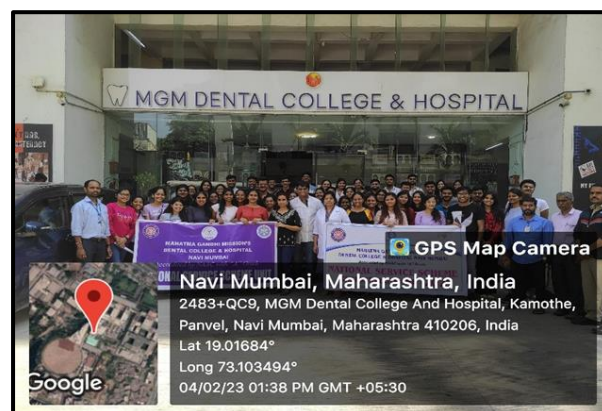

Interpretation and conclusion:

1. Dental caries is the most common problem among the patients followed by gingivitis.
2. Oral health education and prevention strategies should be implemented in order to reduce the disease burden among these patients.
