STEPS OF ROOT CANAL TREATMENT AT CIDCO BHAVAN, BELAPUR CBD

Date: 13th January 2023

Venue: Cidco Bhavan, CBD Belapur

Faculty: Dr. Kashmira Kadam, Dr. Niraj Kolge

Organizing Agency: PHD Dept MGMDCH; NSS Unit, MGMDCH, MGM Hospital And Research
Centre, CBD Belapur & Vashi

Number of Students attended: 4

MGM Dental College is on a continual mission of taking efforts to explained steps of root canal treatment to the community. The oral care initiative was also extended to the employees at CIDCO Bhavan at CBD, Belapur with the motive to create awareness and provide oral health care to them.

Aim and objective:

1. To evaluate the oral health status of the employees and to provide necessary Dental treatment.
2. To evaluate knowledge and awareness of patients regarding endodontic treatment
3. To educate them and create awareness about root canal treatment.

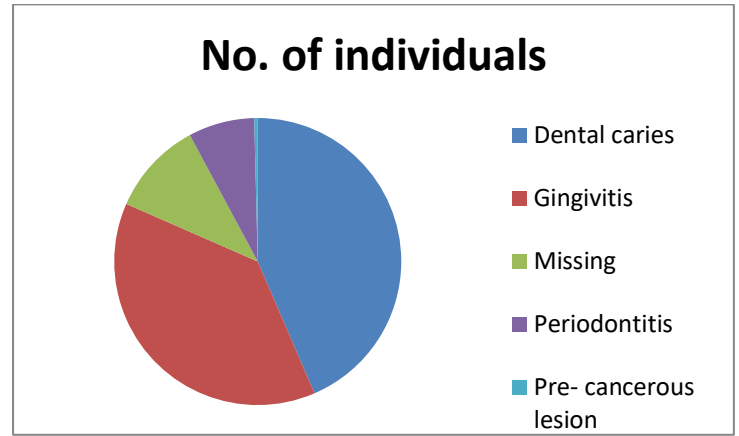

Method:

All the employees were assessed with the use of mouth mirrors and probe by using daylight and torch. They were evaluated on the basis of their oral health status and educated them about their existing dental problems and the importance of getting it corrected. Preventive measures suitable for each employee were explained to them.

Observations: A total of 250 patients were examined for various dental problems. Those requiring extensive treatment were referred to MGM Dental College and Hospital, Kamothe.

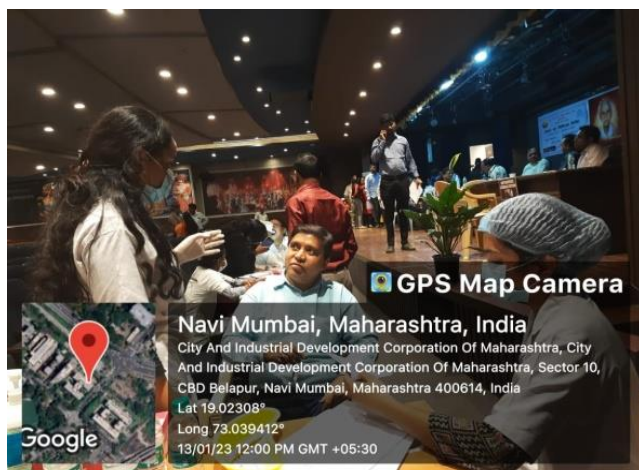

Oral health status:

Condition	No. of individuals	Percentage %
Dental caries	111	44.4%
Gingivitis	97	38.8%
Missing teeth	27	10.8%
Periodontitis	19	7.6%
Pre- cancerous lesion	1	0.4%

Interpretation and conclusion:

- Dental caries is the most common problem among the patients followed by gingivitis. After that missing teeth is common problem because of patients are not aware about root canal treatment which can be help for mastication, aesthetics.
- Oral health education and prevention strategies should be executed so that there is a reduction of the disease occurrence among these patients.
