MANAGEMENT OF DENTAL EMERGENCIES AT THE LANDMARK, KHARGHAR

Date: 24/01/2023

Venue: The Landmark, Kharghar

Faculty: Dr. Kashmira Kadam, Dr. Neeraj Kolge

Organizing Agency: PHD Dept MGMDCH; NSS Unit, MGM Hospital & Research Center, CBD Belapur

Number of Students attended: 2

MGM Dental College is on a continual mission of taking efforts on how to manage dental emergencies to the community. The employees were made aware about the Dental emergencies like avulsion, luxation, tooth fracture, soft tissue lacerations due to accidents and also how to manage them.

Aim and objective:

1. To evaluate the dental emergencies of the employees and to provide necessary Dental treatment.
2. To educate the employees and create awareness about dental emergencies.

Method:

All the employees were assessed with the use of mouth mirrors and probe by using daylight. They were evaluated on the basis of their oral health status and educated them about their existing dental problems and the importance of getting it corrected. Preventive measures suitable for each employer were explained to them.

Observations: A total of 35 patients were examined for various dental problems. Those requiring extensive treatment were referred to MGM Dental College and Hospital, Kamothe.

Oral health status

Condition	No. of individuals	Percentage %
Dental caries	22	62.85 %
Gingivitis	29	82.85%
Missing	7	2%
Malocclusion	1	0.2%

Oral Health Status

Interpretation and conclusion:

- Gingivitis is the most common problem among the patients. Also dental caries and missing teeth were common in these patients.
- Patients were informed about the management of avulsed tooth. All the medium in which avulsed tooth should be kept were mentioned and to reach dentist as soon as possible.
- Preventive strategies should be executed so that there is reduction of the disease occurrence among these patients.
