

Features of KOHA LMS

Online Public Access Catalogue (OPAC) module which provides a simple and clear interface for library users to perform tasks such as searching for and reserving items and suggesting new items. KOHA-OPAC is Web-based Interfaces. Koha's OPAC, circulation, management and self-checkout interfaces are all based on standards-compliant World Wide Web technologies—XHTML, CSS and Javascript—making Koha a truly platform-independent solution. Modern library management systems have web-based OPACs that allow patrons to interface with the library. For example, Koha's OPAC goes beyond merely being a search tool and enables patrons to reserve books, manage their accounts, pay library fees online, track their circulation history, and even make reviews and suggestions for new books.

The OPAC is one of the most heavily used application of KOHA Library management software of central library. Besides listing of the entire books available in the library, it allows indicates status of a particular book. OPAC is searchable by author, title, accession number, subject and several other fields.
