ABOUT THE COURSE:

Haematoxylin–eosin stain (H & E) is one of the most imperative tissue stains used in histology as it is inexpensive, done quickly and done in such a way that a considerable amount of microscopic anatomy is revealed. H & E stain can be used to diagnose a wide range of histopathologic conditions. It is significant to study principle and procedure of routine H & E staining. For undergraduate students, the procedure is less understood. This add-on course will bring staining procedure into limelight.

ABOUT SPEAKER

Dr. Shilpa Patel (BDS, MDS)

Dr Shilpa Patel is presently working as an Professor and HOD in Dept of Oral Pathology & Microbiology, MGM Dental College & Hospital, Navi Mumbai. She has been in academics since the past 27 years. She is actively involved in teaching with special interest in Dental histology and Histopathology.
