Title of the Programme:
**Cranial Osteopathy and its implications
with TMJ**

Date : 16th June 2023

Target Audience: Faculty, Post Graduate Student and Interns

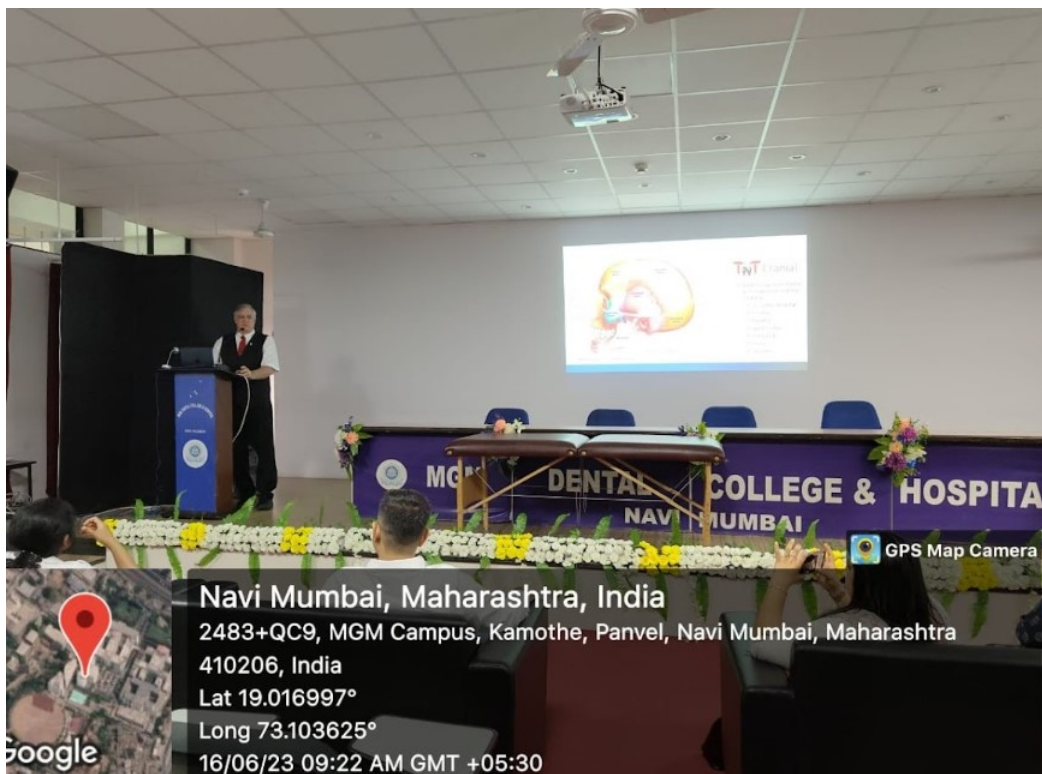

Cranial Osteopathy and its implications with TMJ

The Department of Oral and Maxillofacial Surgery, MGM Dental College and Hospital, Navi Mumbai in association with Osteopathic College of Ontario jointly organized a Guest lecture by Dr. Steve Sanet, Founder of the Osteopathic college of Ontario on 16th June 2023.

The Lecture focused on introduction to the field of Osteopathy and its various clinical and non surgical options. Dr. Steve described its application in temporomandibular joint disorders and musculoskeletal disorders. Osteopathic medicine is a "whole person" approach to medicine—treating the entire person rather than just the symptoms. With a focus on preventive health care, Doctors of Osteopathic Medicine (DOs) help patients develop attitudes and lifestyles that don't just fight illness, but help prevent it, too. Dr. Sanet explained osteopathy focuses on the joints, muscles, and spine and can help treat arthritis, back pain, headaches, tennis elbow, digestive issues, and postural problems. Treatment can also assist with sleep cycles and the nervous, circulatory, and lymphatic symptoms.

The lecture was followed by a demonstration on cranial osteopathy. Overall the lecture and demonstration was very well received and appreciated by the Attendees.
