Occasion/ Event Title: Faculty Development Program on "Blueprinting in Assessment"

Organizing Department : IQAC, MGMDCH & HSET Unit

Number of Attendees: 23

EVENT REPORT

The Internal Quality Assurance cell (IQAC) of MGM Dental college and Hospital, Navi Mumbai had organized a program for Faculty on Blueprinting in Assessment by 2 eminent faculty, Dr. Anita Chalak and Dr. Yogesh Pawade from Seth GS Medical College Mumbai.

The Programme focused on Introducing and training the faculty on various aspects of blueprinting in Medical education and its application in dentistry for better and balanced evaluation in theory exam paper setting. The Hand-on sessions covered the analysis of previous university and internal examination question papers of the respective subjects in dentistry via a balanced approach through categorization into Comprehension, Recall and Application based questions.

The next session focussed on evaluation of prescribed curriculum and formulated syllabus by each individual teacher for their subject in terms of teaching hours, weightage, categorization into relatable topics and groups. The participants used preset Microsoft excel templates to calculate individual marks, weightage of each topic, analysis of core and non-core topics and categorization into the types of questions. The excel sheet was also utilized to distribute the marks into the sections for the theory question paper as per the calculated weightage and preparing a **Blueprint** for the individual subject.

The final session focussed on formulation of Short and long answer questions as per the prepared blueprint. Overall the session was highly appreciated and was refreshing to the question paper setting methodology as it portrayed the same in a new light and scientific way to balance out the syllabus into weighted assessment in the form of Blueprinting.
