Mouth Wash Regime At Z.P. School Saphale

Date: 23rd August 2022

Venue: Z.P. School Saphale

Faculty: Dr. Vaibhav Thakkar & Dr. Pankaj Londhe

Organizing Agency: PHD Dept, MGMDCH; NSS Unit, MGMDCH

Number of Students attended: 2

MGM Dental College in collaboration with Rotary Club District 3141 organized an awareness and a treatment program for school children at Z.P. School Saphale with the intention of creating awareness about the correct use of mouthwashes to the schoolchildren and how it is very important to use it. Oral Health Status was checked of all the school children present and oral health care was provided in the form of preventive treatment modalities like Pit & Fissure Sealants & Fluoride Application for the school children to prevent the teeth from onset of dental caries.

Aim and objective:

1. To assess the oral health status of school children and to provide necessary preventive dental treatments like Pit and Fissure sealants or fluoride gel applications.
2. To educate them and create awareness about use of mouthwash.
3. To prevent further diseases like halitosis by usage of mouthwash

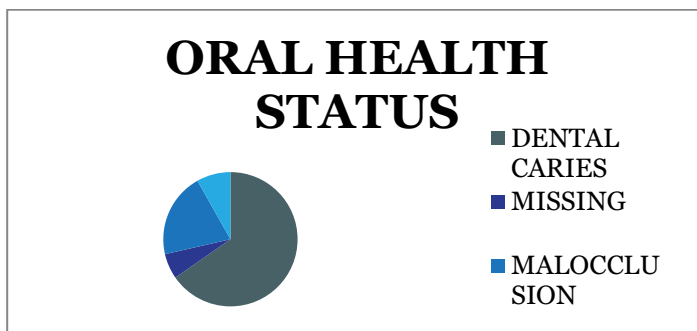

Method:

The students of ZP School, Saphale were made aware about how to use the mouthwash after brushing teeth. All the children were assessed for oral health status and were explained the need to get the problems corrected. The teachers of the children were made aware of the existing dental problems and preventive measures were explained like following Sign:

correct brushing technique, flossing their teeth regularly, using mouthwashes as prescribed by a dentist and also application of preventive treatment modalities for dental caries was carried out like Pit & Fissure Sealants & Fluoride Gel application for the school children wherever indicated.

Observations: A total of 49 students participated in the program & were later examined for oral health and were advised and performed preventive dental treatments.

Condition	No. of individuals	Percentage %
Dental caries	32	33.33%
Gingivitis	4	44.44%
Missing	3	11.11%
Malocclusion	10	11.11%

Conclusion:

1. Inappropriate mouth wash regime or lack of mouth wash habit are the root cause of many dental issues which can be inculcated in young age.
2. Proper mouth wash methods were demonstrated.
3. Oral health education and prevention strategies should be implemented in order to reduce the disease burden among these patients.

HEALTH EDUCATION BEING DONE BY THE TEAM MEMBER
