AWARENESS ABOUT ATRAUMATIC RESTORATIVE TREATMENT AT ZP SCHOOL, PARGAON

Date: 25th August, 2022

Venue: ZP School, Pargaon

Faculty: 2

Organizing Agency: PHD DEPT, MGM DENTAL COLLEGE

Number of Interns attended: 5

SUMMARY

MGM Dental College persistently takes efforts of extending the oral health care to the community. The oral care initiative was also extended to students at ZP School Pargaon with the intention of creating awareness about atraumatic restorative treatment and providing oral health care to the patients. Atraumatic restorative treatment uses manual excavation of dental caries, without the use of any heavy equipment, and restores the cavity with glass ionomer, an adhesive material that bonds to the tooth structure and releases fluoride as it stimulates remineralization.

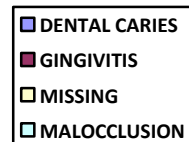

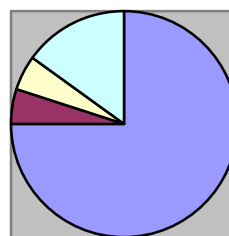

Aims and Objectives:

1. To assess the oral health status of the children and provide fluoride application or pit and fissure sealant application as required.
2. To educate the students about atraumatic restorative treatment and oral health.

Method:

MGM Dental College and Interns organized a program on awareness of atraumatic restorative treatment. Students were explained the need for atraumatic restorative treatment and the manner in which it is done. The patients were made aware of dental decay and preventive measures were explained using posters and charts. All the patients were treated according to their oral health status either with fluoride application, sealant application or both.

Condition	No. of individuals	Percentage %
Dental caries	45	75%
Gingivitis	3	5%
Missing	3	5%
Malocclusion	9	15%

Observations:

A total of 60 students participated in the awareness program & were later examined for halitosis. Many students faced problems of dental decay due to inappropriate brushing method used. Students were explained about the causes and treatment of dental decay
