On 12th June 2022, interns from MGM Dental College and hospital along with faculty members took an initiative to conduct an oral health care checkup at Ramseth Thakur Public School, Kharghar with the intention of creating awareness and providing oral health care to the patients.

Aim and objective:

1. To assess the oral health status of patients and to provide necessary Dental treatment.
2. To educate them and create awareness about oral health.

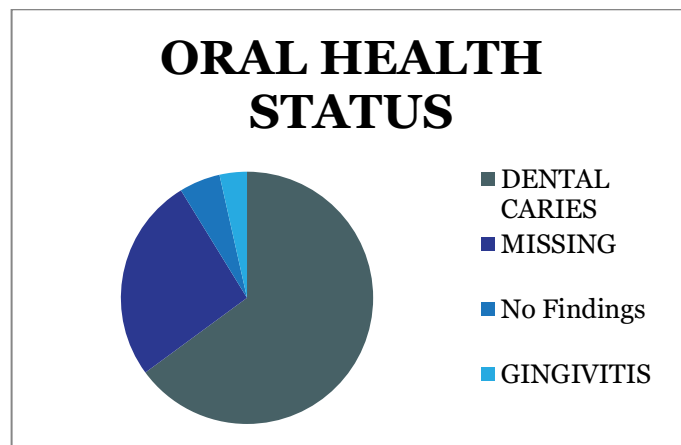

Method:

An examination was carried out with the use of mouth mirror and probe and the patients were assessed for oral health status and were explained the need to get the problems corrected.

Observations: A total of 57 patients were examined for various dental problems. Those requiring treatment were referred to MGM Dental College and Hospital, Kamothe.

Oral health status:

Condition	No. of individuals	Percentage %
Dental caries	37	64.91
Gingivitis	15	26.31
Missing	3	5.26
No Findings	2	3.51

Interpretation and conclusion:

It was found that Dental caries is the most common disease among the population of Kharghar. Oral health education and prevention strategies should be implemented in order to reduce the disease burden among these patients.
