Dear Ma'am/Sir,

I am Dr. Shamli vanve from IDA, designated as Project coordinator for MOCC project.

We are grateful for your generous support extended to the IDA MOCC project from November 2021. Till now we have screened 5400 patients with the support of the dental college interns team.

For future camps, IDA has partnered with MGMDCH and therefore further Camps will be conducted at various MGMDCH dispensaries and hospitals and hence for the execution of the same we need a list of 10-15 interns who can dedicatedly work with IDA for the screening camps.

Please share the list before Monday, as we will be giving all interns a quick training regarding the screening, data recording and sample collection.

List of camp sites is as follows:

Date of camp	Address	No. of interns
31 st May 2022 and 1 st June 2022	1) Prabhadevi dispensary- Paricharika niwas building ground floor old prabhadevi road opp Gammon house Mumbai 13 (PRIVATE) 2) S.B. Mang dispensary- opp one India bull center BMC building Ground floor near Shikshak Bhawan Elephanta Mumbai 13 (BMC) 3) Zandu Ayurvedic dispensary- opp one India bull center BMC building Ground floor near Shikshak Bhawan Elephanta Mumbai 13 (BMC) 4) Prabhadevi ayurvedic dispensary-Dnyaneshwar apartment ground floor, veer savarkar marg, Mumbai 25 5) BDD 45 dispensary- Building no 45 ground floor N M Joshi mang opp jambhori Maldan worli (GOVT) 6) TB Hospital, Sewri - Jorbal Wadia Road, Jorbal Wadia Road, Sewri, Near Indian Cancer Society, Sewri, Mumbai - 400015	10-15

We look forward to hearing from you soon.

Thank you

Warm Regards
Dr. Shamli Vanve

Permission letter

Sign:

MGM Dental College in association with IDA had organised a dental camp with the intention of awareness regarding usage of tobacco products at BDD 45 , Worli. People at the venue instructed about the ill effects of tobacco and treatment options available to avoid use of tobacco.

Aim and objective:

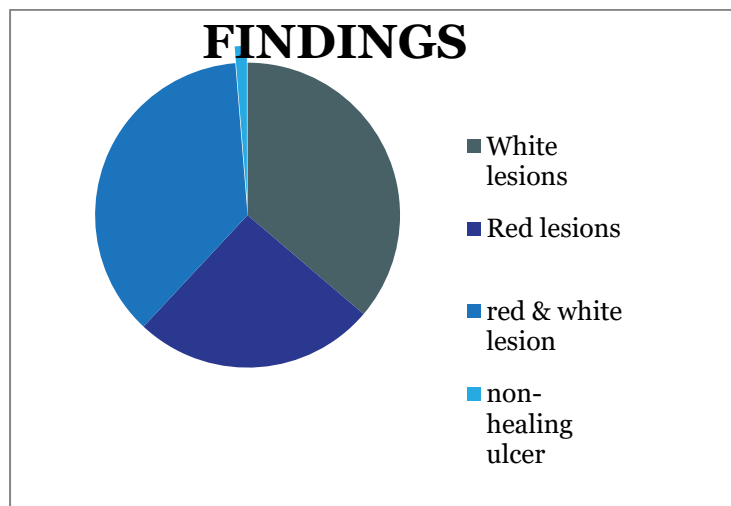

1. To educate about the ill effects and to take necessary precautions.
2. To educate them and create awareness about tobacco products.

Method:

A team of faculty and interns conducted a study with the use of dental equipment in day light at BDD 45, dispensary, worli. All the patients were made aware of tobacco products and their contents. Flow charts, models were shown to people at the community. The patients were made aware of the existing problems due to tobacco and preventive measures were explained.

Observations: A total of 29 people were examined for various dental problems caused due to tobacco. Those requiring extensive treatment were referred to MGM Dental College and Hospital, Kamothe.

Condition	No. of individuals	Percentage %
White lesions	10	34.4%
Red lesions	7	24.13%
Red & white lesions	10	34.4%
Non- healing ulcers	2	6.8%

Interpretation and conclusion:

White lesions were the common findings at the venue followed by red lesion.

Oral health education and prevention strategies should be implemented in order to reduce the disease burden among these patients.
