The faculty of PHD Department MGMDCH, OMFS Dept. MGMDCH, Interns NSS unit of MGMDCH had organized a camp Screening For Oral Premalignant Lesions At Water Purification Plant, Bhokarpada on the occasion of World Anti-Tobacco Day in order to educate and spread awareness regarding the same amongst the local public

Aim and objective:

1. To interview the participants regarding their knowledge about ill effects of tobacco.
2. To assess the oral health status of patients.
3. To educate them and create awareness about the hazards of tobacco consumptions in day to day life

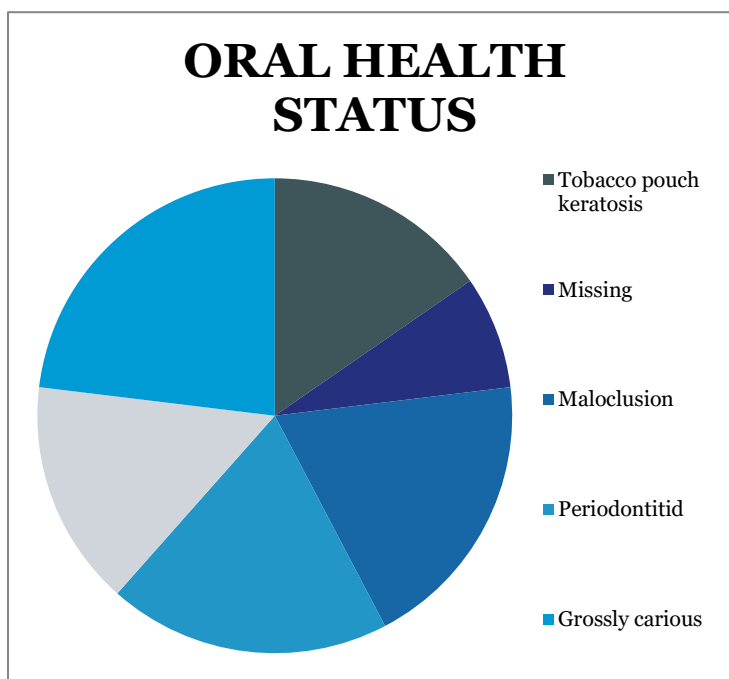

Method:

Initially the participants were interviewed on the basis of a structured questionnaire regarding their current knowledge of the ill effects of tobacco on their oral and general health. Screening was carried out with the use of mouth mirror and probe in day light. After this, the patients were educated and counselled about the hazards of tobacco ,demonstrated various oral hygiene measures using models and charts.

Observations: A total of 26 participants were screened for oral premalignant lesions and dental problems . Those requiring extensive treatment were referred to MGM Dental College and Hospital, Kamothe.

Oral health status:

Condition	No. of individuals	Percentage %
Tobacco pouch keratosis	4	15.38
Missing	2	7.69
Malocclusion	5	19.23
Periodontitis	5	19.23
White lesions	4	15.38
Grossly carious	6	23.07

Interpretation and conclusion:

Dental caries is the most common problem among the patients followed by Periodontitis.

Oral health education and prevention strategies should be implemented in order to reduce the disease burden among these patients.
